

Drawing Notes
1. V2 redraw prioritizes recognizable robot form: chassis/ballast body, treaded wheels, screw anchors, outriggers, intake, gantry, tools, and sensors.
2. Documentation governs baseline values: 70 m3 ballast, 12 cells, 8 anchors, 1 m anchor length, 0.4 m helix, 0.5 m auger, +/-2 mm gantry target.
3. Visual proportions are interpreted from the baseline and rough CAD layout; interpreted envelope dimensions are marked PROVISIONAL.
4. This is still a concept orthographic sheet, not final fabrication geometry or a tolerance-controlled manufacturing drawing.

CONTAINER ROBOT		CONCEPT / PROVISIONAL
Orthographic Projection - Six Views		Units: mm unless noted
Sheet: A3 landscape		Scale: visual concept
